Additionally, here is the latest guidance in response to COVID-19:

Recommendations to Cancel Adult Elective and Non-Essential Medical, Surgical and Dental Procedures: CMS released recommendations to delay non-essential procedures in an effort to preserve personal protective equipment (PPE), beds, and ventilators for facilities as well as to free up health care workers to treat patients with COVID-19. The recommendations provide a framework for hospitals and clinicians to implement immediately to determine and

identify non-essential and elective procedures. The recommendations and guidelines can be found [here](#).

Strategies for Optimizing PPE: CDC released PPE guidance that will provide guidance in PPE shortages, particularly for long-term care facilities, dialysis, and home health providers. The strategies include information specific to eye protection, isolation gowns, facemasks, and N95 respirators. The information can be found [here](#).

Guidance for Clinicians Caring for COVID-19 Patients: CDC's *Prepare to Care for COVID-19* is a resource with practical tools clinicians can use to care for patients with COVID-19, and will be regularly updated to help clinicians adapt as the outbreak unfolds. More information can be found [here](#).

FAQs on Hand Hygiene for Healthcare Personnel: CDC released FAQs on hand hygiene and options for responding to shortages of alcohol-based hand rubs. The information can be found [here](#).

FDA Continues to Facilitate Development of Treatments: The FDA has been working closely with other government agencies and academic centers that are investigating the use of the drug chloroquine, which is already approved for treating malaria, lupus and rheumatoid arthritis, to determine whether it can be used to treat patients with mild-to-moderate COVID-19 to potentially reduce the duration of symptoms, as well as viral shedding, which can help prevent the spread of disease. Studies are underway at the FDA to determine the efficacy in using chloroquine to treat COVID-19. More information can be found [here](#).

FAQs for Catastrophic Health Coverage: CMS released an FAQ document that clarifies coverage for the diagnosis and treatment of COVID-19 by catastrophic health plans. The FAQs issued today align with guidance the Internal Revenue Service (IRS) released last week, which provides flexibility to high deductible health plans to provide health benefits for diagnosis and treatment of COVID-19 without application of a deductible or cost-sharing. The FAQs can be found [here](#).

Guidance on How to Care for Someone at Home: This guidance has information on how to best assist if you are caring for someone at home, how to monitor for emergency signs, prevent the spread of germs, treat symptoms, and carefully consider when to end home isolation. The information can be found [here](#).

Guidance on Essential Critical Infrastructure Workforce: The Department of Homeland Security identified essential critical infrastructure workers that are needed to maintain the services and functions that Americans depend on daily. Examples of the workforce include: communications, chemical, nuclear, energy, government facilities, healthcare and public health, defense industrial base, water, and many others. The memo can be found [here](#).
