

# Building the School CSR Project

**The idea and desire of one of our kind-hearted clients, to give back to the community and share part of what they have with those less fortunate.**

**The next step was evaluating the needs of the school within the available budget and start with the project pre-work. Then, upon arrival the members of the group personally worked on the final touches and interacted with the children and principal, who felt so touched that they felt the need to come back and thank the participants with some kind words of gratitude as this was dream come true for them!**
