Michigan Department of Labor & Economic Opportunity
Attn: Eric Frederick, Chief Connectivity Officer
Michigan High Speed Internet Office (MIHI)
Prosperity Division

Dear Mr. Frederick,

On behalf of the Lansing Regional Chamber of Commerce (LRCC) we are in support of Comcast's Realizing Opportunities with Broadband Infrastructure Networks (ROBIN) grant application to expand fiber-to-the-home broadband service in underserved and unserved homes in Mid-Michigan, across Clinton, Eaton, and Ingham Counties.

Comcast's application will enable broadband deployment to nearly 16,000 unserved and underserved homes and business in rural Mid-Michigan. As the voice of business in the Greater Lansing region, the LRCC knows full well how essential access to reliable, high-speed internet is. For rural areas to thrive, it is imperative that we support efforts to build the broadband infrastructure needed to grow and retain jobs, educate our kids, and expand access to health care.

We support every effort to expand broadband access to underserved areas of the region and Comcast's effort to increase internet access in Mid-Michigan.

Thank you for your continued efforts to expand broadband services to all areas of our great state.

Sincerely,

Tim Daman
President & CEO
Lansing Regional Chamber of Commerce
