Part D 2024 Thresholds:

Initial Coverage Limit: Once your total out-of-pocket spending (member payments + CDPHP payments) reaches \$5,030, a coverage gap begins.

Coverage Gap*: Begins when your Medicare Part D plan's initial coverage limit (\$5,030) is reached and ends when you spend a total of \$8,000. If your rider does not include coverage through the gap, you will pay 25% for Tier 1 through 5 generic drugs and 25% for all Tier 3 through 5 Part D brand drugs (as defined by CMS**) during the coverage gap until your Part D total out-of-pocket spending reaches \$8,000 and you qualify for catastrophic coverage.

Catastrophic: Begins when your total out-of-pocket Part D drug expenditures (member payments + manufacturer discounts)* reach \$8,000. Once you reach the catastrophic threshold, your drugs are covered in full.

* The Medicare Coverage Gap Discount Program provides manufacturer discounts on brand-name drugs to Part D enrollees who have reached the coverage gap and are not already receiving Extra Help. A 70% discount on the negotiated price (excluding the dispensing fee and vaccine administration fee, if any) is available for brand-name drugs from manufacturers that have agreed to pay the discount. Both the amount you pay (even if you are only responsible for your standard copayment through the coverage gap) and the 70% discounted by the manufacturer count toward your out-of-pocket costs as if you had paid them and moves you through the coverage gap. The coverage for generic drugs works differently than the coverage for brand-name drugs. For generic drugs, only the amount you pay counts toward your out-of-pocket costs. Additional information about your out-of-pocket costs in the coverage gap can be found on the plan-specific Medicare pharmacy rider page.

** Brand-name drugs are NDA and ANDA drugs produced by manufacturers that have contracted with CMS to offer this discount.
