

*Wait...*

# CONGREGATE

*Safely.*

As businesses are reopening and stay-at-home orders are lifting, we urge you to take precautions to protect yourself and others from COVID-19.

COVER YOUR FACE.

KEEP HANDS CLEAN.

MAINTAIN YOUR SPACE.

WAIT... CONGREGATE SAFELY.

- Studies show that African Americans may have a significantly **increased risk** of contracting COVID-19 and developing more serious complications from COVID-19 illness...which could even lead to death.
- 8 out of 10 deaths reported in the U.S. have been in adults age 65 and older; continue to stay home if possible.
- Even the **young and healthy** may contract COVID-19, you are not immune.
- You may even be sick but experience **zero symptoms**, which means you are spreading the virus
- Have **RESPECT** for the health and well-being of those around you by following the simple rules above!

In partnership with local pastors, community leaders and healthcare organizations, the "Wait. Don't congregate" movement was created to promote continued safe social distancing practices to protect you, your loved ones and the community at large.

**#WaitDontCongregate #WaitCongregateSafely**
