

New Baptist Hospital Construction Update July 2023

Surgery Services

Undergoing surgery can be stressful for patients and their loved ones. To help ease that stress, we have incorporated many special features in the new Baptist Hospital that make the experience safe, efficient and convenient.

Our surgery department is located on the second floor of the new hospital so it's easy to find. An elevator in the main lobby dedicated solely for surgical patients provides quick access to and from the department while maintaining every patient's privacy during their stay. A special discharge lounge reserved for the use of our surgical patients further maintains privacy.

Within the department, 26 operating and procedure rooms are available to meet every surgical need, including interventional radiology and heart catheterization procedures. Our advanced hybrid OR is equipped with the latest technology for more complex surgeries. Every aspect of the design and layout of the department will contribute to efficiency and patient safety.

For surgical services, you can trust Baptist to provide the highest level of care in a facility unmatched in the Northwest Florida/South Alabama region. Learn more about our new campus at [ebaptisthealthcare.org](https://www.ebaptisthealthcare.org).
