

Area Businesses Work Together to Keep Hyperbarics in Pensacola

Next Level Oxygen Hyperbaric MedSpa announced its closure earlier this month.

Owner Aimee Allenback is delighted to have accomplished the goal of bringing hyperbaric oxygen therapy (HBOT) to the panhandle for the last two years. She is

excited to share that it will remain available and accessible right here in

Pensacola! Allenback has partnered with Dr. Craig Henry of Henry Chiropractic and will be relocating hyperbaric services to his practice. Dr. Henry is passionate about creating total body wellness solutions and HBOT is a great adjunct therapy for his chiropractic services. Community members are so fortunate to have these two working together to bring and keep this therapy in the forefront of available

health options. HBOT can be used for a multitude of healing reasons and to promote general health and wellness. Henry Chiropractic will begin offering hyperbarics on Monday, August 28th. To schedule an appointment, call Henry Chiropractic at 850-435-7777.
