Automotive	Water Technology	

Case Study

CHALLENGE

Pratt & Whitney, a global aerospace manufacturer, needed a solution to meet their diversity and inclusion strategy. They asked Manpower Engineering to fill two leadership positions and four engineering roles with a focus on talent diversity.

SOLUTION

Manpower Engineering dedicated a recruiting team to attract a full range of qualified diverse talent, experiences, styles, and perspectives. We provided dedicated management and onsite representation to work with the HR and business managers during the recruiting and interview process.

RESULTS

Manpower Engineering filled all six roles with diverse candidates while saving the client valuable time and delivering continuous process improvements that supported future hiring initiatives.

Manpower Engineering Delivers

Project Solutions

Manpower Engineering provides services to support your Engineering Project Management and Outsourcing needs on-site, off-site, or offshore.

Contract and Permanent Placement

Any Engineering specialty, any length of engagement, any number of professionals. Manpower Engineering professionals achieve their goals faster so you can too.

Resourcing Solutions

We can deliver innovative workforce management strategies to help you create flexibility and find cost savings so you can focus on your core competencies.

Training

We offer more than 4,000 free courses to help our professionals – and yours – stay ahead of the industry curve and earn the certifications and accreditations needed to succeed.

Connect with us today to explore how Manpower Engineering can help you grow your business through specialized expertise and project solutions.
