

Q: Why are you running?

A: I have seen the city changing and I am concerned about the lack of leadership. I want to bring greater transparency and community involvement that will assure our citizens the quality of life they are used to. I will provide the vision that will give our city a strong future.

Q: What are 3 top issues you would like to focus on?

A: We need to provide resources asked for by police in order to hire and retain officers at the level Chandler requires. Secondly, we need to address the build out of the city and secure our economic growth. Our growing homeless population needs to be a priority. We need to create programs that work to decrease these numbers.

Q: How will your campaign embody the values of the Chandler Chamber?

A: My campaign is based on the principles “Listening, caring, and working for Chandler”. I will bring transparency to our city, allowing citizens to be involved in the process as I work for them and earn their trust. Caring about all members of our community means building coalitions and using shared values to reach the goals we set. Lastly working for Chandler will give me the opportunity to make a difference as I put those goals into action. We can grow and everyone will prosper when we are working together.

Q: How will the Chamber’s endorsement help you in the race?

A: Having the support of the Chamber will allow my voice to be heard and more citizens to see the value of my message. I see the Chamber as a partner in our city and vital to our success. This is the partnership needed to reach our shared goals and having your endorsement and the support of business will help my campaign and the city together.
