HOMECOMING GRANT RECIPIENT

We are pleased to announce that Jessica Walvoort has been named as this year's recipient of the Homecoming Grant. Jessica will receive \$6000, payable over four years, to assist with school loans.

Jessica graduated from Dordt College in May 2018 and works as a Resource Teacher at Sioux Center Christian School. "I am humbled and blessed to receive such a generous grant. It is an honor to be chosen from so many qualified applicants. I look forward to continuing to serve my community in the years to come," stated Jessica. Among many other volunteer experiences, Jessica participated in OWLS Nest through the Sioux Center Public Library and she provides respite care for families who have students with special needs. She is also active in her church, is actively assisting SCCS in welcoming Hispanic families to the school community and continues to look for opportunities to develop a bridge between the diverse cultures in Sioux Center.

"We were thrilled with the number and quality of applications we again received this year," shares Barb Den Herder, Executive Director of the Sioux Center Chamber. All applicants needed to meet the following criteria: has or will graduate from a two- or four-year college in 2017, 2018, or 2019; lived in the 51250 ZIP code when they graduated from high school; has accepted an offer for a position in Sioux Center; and has student debt more than \$6000. Applicants were evaluated on their level of involvement in the community, their history of volunteer experience, and their interest in investing in our community. "It was a very difficult decision, and all candidates are wonderful investments to our community. We are fortunate to have this level of talent working in Sioux Center," includes Den Herder.

LOCAL CREW TO UPDATE ALL ELECTRIC METERS

This spring and summer, Sioux Center Municipal Utilities will continue to replace all residential and commercial electric meters with advanced meters as part of a city-wide update to improve services.

Electric meters are located on the outside of homes and businesses, and the local SCMU electric department staff will be replacing the existing meter for each customer. The updated meter is paid for by SCMU.

When the meter is switched out, the home or business will experience a very brief outage. People may have to reset clocks and other devices.

Advanced meters are utility meters that link with a central system to remotely measure customers utility use. They also offer the capability of identifying outages to help restore power quickly and reading meters at the same time and date each month to help customers better understand their monthly utility usage.

People can direct questions about this meter update to Fedders at the City Office, at 712-722-0761.
