Economic Realities

- 3 Things Happen In An Economic Region:
 - Generate wealth
 - Recirculate wealth within region
 - Wealth migrates to other regions
- You must be able to move people, product and information - rapidly, effectively and efficiently - that requires mobility
- Innovation drives economic development – which demands technology discovery and smart people
- 97% of the worlds consumers live in other countries – that means international trade

Strategic Plan Based on Industry Cluster Model

Strengthening the 5 primary economic foundations in alignment with and support of our primary industry clusters is equally critical to our economic sustainability.
