

COVID-19 Basic Infection Prevention Measures

COVID-19, caused by a new coronavirus, is a respiratory illness that can spread from person to person. The following infection prevention measures may help prevent transmission on construction job sites.

| | |
|---|---|
|  | Stay home if you are sick. DO NOT WORK. |
|  | Wash hands frequently or provide alcohol-based hand rubs containing at least 60% alcohol. |
|  | Cover coughs and sneezes. |
|  | Practice social distancing — try to maintain 6 feet between each worker. |
|  | Reduce the size of any group at any one time to ten (10) people or less or LIMIT all in-person meetings. |
|  | Minimize ride-sharing. While in vehicle, employees must ensure adequate ventilation. |
|  | Avoid sharing tools with co-workers, if possible. |
|  | Clean and disinfect frequently used tools, equipment, and frequently touched surfaces (door handles, handrails, machinery controls, cell phones, tablets) on a regular basis. |
|  | If N95 respirator masks are not available, minimize dust and airborne contaminants by using engineering and work practice controls. |
|  | Use proper personal protective equipment (PPE) when cleaning and disinfecting, such as gloves and eye protection. |
