3  Question: The CDC recommends using masks and social distancing for the foreseeable future. How could these recommendations affect your ability to perform your job?

The Affect of Masks and Social Distancing on Job Performance

- 41%: No impact on my ability to do my job
- 38%: It will be difficult to do my job
- 13%: I don’t want to work if I have to be around people
- 8%: Impossible for me to perform my job

4  Question: Do you plan on working the same number of hours or same schedule you worked before Covid-19?

- 59% believe that their schedule and work hours will return to normal after the COVID-19 crisis
- 18% say they want the flexibility to continue working from home at least part of the time.
- 15% said they don’t know if their schedule will stay the same or uncertainty regarding childcare
- There was no significant difference between men and women on this topic

5  Question: As a result of this pandemic, what do you value most in your job/career?

- Most respondents reported that they valued the money and benefits from their job the most due to the current crisis (35%), followed by a positive work environment (22%), job security (19%), and flexibility (19%). Men and women answered similarly, although women rated flexibility third most valued, while none of the men chose flexibility as something they valued most.

6  Question: As a result of this pandemic, what characteristics do you value most in a boss or supervisor?

- Respondents reported a wide variety of boss characteristics they value due to the current crisis. Communication, compassion, and understanding were the most popular characteristics.
- Men and women both identified communication as one of the most important characteristics in a boss or supervisor (33% and 27%, respectively). Women also mentioned compassion (13%) and understanding (11%) while men mentioned understanding (11%) and leadership (11%).
Examples of comments listed as “Other”:

- To be more supportive and recognize the fact we are all adjusting to the new norm of things. Some of us have anxiety over this and they don’t care.
- Transparency on what steps or actions are being considered or will be taken.
- Effective and efficient communication as well as trust that employees are still doing their job/work at home.
- More positive feedback. Putting myself and my families health at stake to go in every day is tiring.
- Compassion. Understanding that we are putting our lives on the line to make them money.
- We have not been supplied with anything to keep us or others safe.
- Compassion and understanding employees fears & concerns.
- Clear and regular/frequent communication.
- Their trust in me to do my job remotely.
- Genuine concerns for staff safety.

7 Question: What measures can employers take to create a safe and normal work environment post Covid-19?

Out of 75 New Mexicans who answered the question:

- 27 respondents encouraged employers to follow expert guidelines (from the government, CDC, health experts, etc.)
- 22 respondents noted the importance of staying home and taking measures to limit exposure.
- 15 urged employers to be more supportive and understanding of their employees.
- 11 cited the importance of providing PPE for employees.
- 10 urged employers to allow or support telework.
- 6 noted the importance of better communication from employers.
