Introduction

Welcome to The Portal

Your Portal is a repository for information shared between you and your agent. It's a central location that organizes Auto Searches, Reports and Selected Listings in a way that helps you better manage each of them going forward.

Your Portal also allows you to create, and save, your own Custom Searches. It's a communication tool that, through email or listing notes, connects you with your agent whenever additional property information is required.

And, finally, because your Portal is dynamic, you're always viewing live, up-to-the-minute data. So, whether there's been a change in listing price or, perhaps, an updated public remark, you'll see it all in real-time.

So, let's explore, in detail, each of the features that will come to make your Portal experience a productive one.

Enjoy.
