Providing resources that strengthen and support children and their families

Hively Mental Health — Hively celebrated the opening of Hively Mental Health in Pleasanton, the second of two site-certified clinical therapy locations for the longtime Tri-Valley nonprofit. Hively also provides clinical mental health services from offices in San Leandro. Hively CEO Mary Hekl said, “The additional Pleasanton location helps to accomplish the goal of available, accessible, and affordable community mental health services, providing Tri-Valley residents with a menu of low-cost options to address a variety of needs. Hively will offer in-person and remote one-to-one therapy, as well as group counseling sessions. Additionally, Hively’s MFT Trainee program will ensure the supply of licensed therapists continues to build to meet the increasing need for services.” Learn more at behively.org.
