

Building and construction

Houses, roads, airports, factories, and other places need people to design, build, and mend them. This is what people working in building and construction do. No exam level jobs...

Scaffolder

Scaffolders put up metal tubes and platforms called scaffolding. Builders and other workers use this to reach the high parts of buildings.

Building Labourer

Building Labourers work on building sites. They do a range of tasks to help bricklayers and other construction workers. They use power tools such as drills and special equipment like cement mixers.

Painters and Decorators

Painters and Decorators work on the inside and outside of buildings. They use paint and wallpaper to make rooms and buildings look good.
