Manufacturing and production

These jobs are about making things. In the past, people used their hands to make just about everything. But now most of the people doing these jobs use machines to make things. No exam level jobs...

Food Processing Workers

Food Processing Workers help to make and to package food in a factory. This is called food processing.

Abattoir Workers

Abattoir Workers work in an abattoir. These are places where animals are killed for meat. The animals have to be killed humanely. This means obeying all the rules for animal welfare, and trying not to upset the animals.

Assemblers

Assemblers make things in factories. These could be anything from computers to cars. Assemblers fit the parts together. Some assemblers fit all of the parts together to make a whole item. Others work in a team where each person in the team fits a different part.
