

ITA International (ITA) is a provider of integrated support services to include analysis, planning, training, acquisition management, cyber/intelligence, engineering, logistics, and maritime support services to government, non-governmental organizations and commercial customers worldwide.

Using our ARENA Process, we analyze the mission, identify all requirements, and develop innovative, integrated solutions to meet current and emergent needs and advance our clients' missions and objectives.

Integrated solutions to meet current and emergent needs

At ITA, we are committed to providing rapid, professional responses to our clients' requirements through ongoing analysis, planning, realistic training, operational support, and thorough assessments and evaluations. We consistently meet all schedule, budget, and quality constraints through our low-risk, best-value technical and management approaches, which are based upon lessons learned, previous client assessments, and industry best practices.

The key to our success is continually meeting with our clients, both formally and informally; listening to their needs; and developing the right solution at the right price.
