

**ADVERSE EVENT OUTCOME REPORT**

**Report Period** \_\_\_\_\_

<b>Development of Urinary Tract Infection</b>
---

*Definition: The patient had not been treated for urinary tract infection in the 14 days prior to SOC/ROC, but had been treated for a urinary tract infection in the 14 days prior to discharge. OASIS M0 Triggers: M0510 (SOC/ROC and DC)*

Pt. Name \_\_\_\_\_ SOC date \_\_\_\_\_ D/C date \_\_\_\_\_ MR# \_\_\_\_\_

Age \_\_\_\_\_ Sex \_\_\_\_\_ Case Manager \_\_\_\_\_

Review Date \_\_\_\_\_ Reviewer \_\_\_\_\_

QUESTIONS	YES	NO	IE	COMMENTS
Had the patient been treated for a UTI in the 14 days prior to SOC/ROC?				
If yes, then was the OASIS question answered incorrectly?				
If no, was the patient treated for a UTI in the 14 days prior to discharge from the agency?				
If no, was there an error in OASIS documentation?				
If the documentation does not support the definition of an adverse outcome, stop the audit at this point and investigate how the OASIS errors occurred and re-train staff as needed.				
Was the patient using good personal hygiene techniques?				
Was the pt/cg taught the signs and symptoms of an infection?				
Was a foley catheter placed in the patient during the admission?				
If so, was the pt/cg taught proper catheter maintenance techniques?				
Does the patient have a history of repeat UTI's?				
Was the pt/cg instructed regarding proper hydration?				
If the pt developed a UTI, was a C&S collected prior to				

treatment?				
What signs and symptoms did the patient have?				
If pt was prescribed a prophylactic med for UTI's, were they taking properly?				
<i>IE = Insufficient evidence documented to make decision/not documented</i>				

### ADVERSE EVENT OUTCOME REPORT-Development of Urinary Tract Infection

<b>Conclusions</b>		
Based on the documentation, could this adverse outcome have been prevented?	YES	NO
UNSURE		
If yes, what may have been done to prevent the adverse outcome:		
If no, explain:		
If uncertain, explain:
