Career Pathways Trust

Career Pathways

Castro Valley High School's career pathways programs have proven time and time again how valuable work-based learning experiences are in teaching our students how their skills relate to the world of work. Our engaged industry partners provide guest speakers, site tours, and summer internships, allowing all pathways students to better understand careers, the modern workplace, and their own professional journey. As the school year slowly winds down, our focus is primarily on setting up summer internships for motivated students in our pathways.

We are still looking for available summer internship hosts for the Health and Biotechnical (HABIT) pathway. We prepare our motivated students with a selective vetting process and a series of soft skills workshops that encompass professional skills, resume/cover letters, and interviewing for jobs. These are non-paid internships with liability insurance covered by Eden Area ROP. We encourage our hosts to provide interns with work experience that relates directly to their pathway or our students have proximity to professionals in their chosen field to better see how their skills are practical in a work context.

The Health/Biotech internship hosts can be in non-profit work related to health that allows students to learn about how health is intertwined in many facets of that kind of profession. Examples include but are not limited to the following:

Public Health

Non-Profits

Health and Wellness Outreach

Animal Care

Medical and Allied Fields

If you have any questions about the program and wish to participate in some capacity, please contact:
