

I am the owner and designer for Designs by Andrea. As a design professional I take pride in envisioning how a space will serve my clients for years to come. I have a special knack for putting myself in my clients' shoes and making them feel comfortable with the design process. I walk them through the creative and practical sides of design while helping them achieve results that best reflect your individual tastes and needs of they're home. With a particular interest in fabrics, patterns and textures, I like to express my design inspirations primarily through color and textiles. I Specialize in design consultations for space planning, new builds, remodeling, flooring, kitchen and bath design, paint color, lighting selection, furniture selection, window treatments and accessorizing. No project is too big or small!
