

## **SFFMA Industrial Firefighter I and II Certification Program**

Applicant must be an active individual SFFMA member, and an employee of an industrial facility member of the SFFMA.

### **Required Components for SFFMA Industrial Firefighter Certifications**

#### **SFFMA Industrial FF I:**

1. NFPA 1081: Advanced Exterior Industrial Fire Brigade Member (ProBoard/IFSAC Certification preferred).
2. Hazardous Materials Technician Certification in accordance with NFPA 472/1072 or 29CFR1910.120 (q).
3. Must provide proof of equivalent training and pass written and skills testing for items #1 and #2 above if not already certified.
4. National Incident Management Systems/Incident Command training in accordance with ICS-100, 200, 700, or proof of equivalent training.
5. CPR, AED, and First Aid training.

#### **SFFMA Industrial FF II:**

1. Hold SFFMA Industrial FF I, or have completed the above training.
2. NFPA 1081: Interior Structural Industrial Fire Brigade Member (ProBoard/IFSAC certification preferred).
3. Must provide proof of equivalent training and pass written and skills testing for Hazardous Materials Technician and item #2 if not already certified.
