

COVID-19 TIPS

SOCIAL DISTANCING

- *Social distancing means staying home.*
- *If people stay home, the virus has less chance to spread.*
- *It helps prevent the spread of COVID-19 in WY.*
- *The virus impacts everyone and can be deadly for some.*

ANYONE can spread the virus to another person. Social distance makes the difference for people you care about and your local health care system.

You can stop the spread to **your extended family** by staying home, delaying family gatherings and keeping 6 feet apart when you drop off supplies and groceries.
