

Joe D'Cruz

Joe D'Cruz is the founder and Managing Director of Catalyze Dallas, where he harvests proven intellectual property (IP) and underperforming business units that leverages his team's expertise to commercialize and launch disruptive/innovative solutions in new markets. He is also a cofounder and board member of Catalyze Dallas' first company, Metro Aerospace – which

commercialized fuel-savings and emissions-reduction technology sourced from Lockheed Martin. In addition, D'Cruz serves as Executive Chairman of Catalyze Dallas affiliate Alpine Advanced Materials, a pioneer in lightweight and affordable structural thermoplastic nanocomposites.

D'Cruz is also heavily involved in two Think Tanks in Washington D.C., Business Executives for National Security (BENS) where he sits on the implementation working group developing policy for the Great Power Competition (GPC). This committee is focused on fueling innovation as it relates to National Security. The second is the Center for Advanced Defense Studies (C4ADS), where, as a Board member, he is involved in supporting the organization's adoption of technology to advance its capability to identify and locate illicit actors involved in human trafficking, illegal arms trade, money laundering and other nefarious activities.

D'Cruz is a results-driven senior executive and entrepreneur with achievements in both early-stage and established multinational corporate environments. His creative and visionary approach has consistently delivered strong revenue growth, while laying the foundation for sustained development and profitability. His extensive experience and vast success have established him as a leader of unparalleled ability.
