Book signing and reception to follow

Books available for purchase

Learn how to propel new forms of **innovation and economic growth**
as you strengthen your leadership in the community!

The events of 2020-21 radically disrupted higher education. To thrive in continued uncertainty, we need people willing to share their thoughts and try out new ideas.

Author and strategist Glenn Llopis breaks individuality down into its component parts and offers a practical method to help you and your organization continuously assess, interrupt and pivot from suppressing to unleashing. In this, his fourth book, Glenn reveals the five indicators that prevent institutions across health care, corporate and higher education from making false assumptions about who belongs where, doing what, and how.
