

Visitation Guidance for Family and Friends

For your safety and the safety of our residents and staff, we have compiled visitation guidance for you to review prior to visitation:

- If you are ill or have been in contact with someone with COVID-19 in the past 14 days, do not visit in the facility in person. Are you feeling well and have had no close contact to someone with COVID or other contagious illness? If you are not well or have been recently exposed, please postpone your in-person visit. A virtual or window visit may still be possible.
- Are you aware of the risk of exposure to COVID or other possible illnesses that are sometimes found in congregate living settings? There are risks associated with close visitation and congregate settings regarding infections. Please evaluate this risk with respect to your personal health situation. If you are uncertain, speak with your physician, or ask to speak with the Director of Nursing, or Infection Preventionist.
- Have you contacted the facility to schedule a visitation day and time? To ensure we have ample room for safe visitation, we ask that you schedule your visit.
- You will be required to wear a mask regardless of vaccination status in community areas of the facility, (e.g., in the lobby, or while walking to the resident's room).
- Visitors, regardless of their vaccination status, should wear a mask for source control and physically distance from other healthcare personnel and other patients/residents/visitors that are not part of their group at all other times while in the facility.
- Facilities might need to limit the total number of visitors in the facility at one time in order to maintain recommended infection control precautions.
- Perform Hand Hygiene on entering the facility.
- Complete the required screening questions and temperature check.
- Provide contact name and number should we need to notify you of a possible exposure or outbreak after you have visited.
- Thoroughly review this visitation guidance and adhere to COVID safe practices while in the facility. Take note of signs throughout the facility so you do not wander into areas that may pose additional risk.
- Perform hand hygiene on exiting the facility.
- Notify the facility if you present with symptoms of COVID or other contagious illness at; Facility Number: _____.

Enjoy your visit with your family, loved one or friend!
