FTK  
PANDEMIC RESPONSE  
CORONAVIRUS  
COVID - 19  
DECONTAMINATION

**WE'LL HELP YOU PROTECT YOUR PEOPLE  
AND YOUR BUSINESS**

**What is it?** Novel COVID-19 Coronavirus, (SARS-CoV-2) is a highly contagious, severe respiratory virus that can lead to pneumonia, multi-organ failure, and even death.

**How is it transmitted?** Coronavirus is generally transmitted person-to-person through respiratory droplets when an infected person sneezes or coughs, but it may also be spread when someone touches a contaminated surface like a door handle, a counter, or a chair, where the virus can sometimes live for days.

**Do I need to decontaminate my workplace or facility?** If you feel it's possible that someone infected with the Covid-19 (SARS-CoV-2) virus could have been in your facility, it is highly recommended for preventative decontamination.

**What's involved?** Our team arrives in protective personal equipment. We apply CDC recommended and EPA approved disinfectants and processes to treat the designated areas.
