

**Nailer and Stapler Safety Exam**

Directions: Fill in the blank spaces with the words from the word bank.

1. Never carry the nailer or stapler with your \_\_\_\_\_ on the trigger.
2. Always wear \_\_\_\_\_ protection while using the nailer or stapler.
3. The fasteners used should \_\_\_\_\_ the manufacturer’s nailer or stapler being used.
4. Always be sure that the \_\_\_\_\_ safety is in place and working before using any gun.
5. Nailers and staplers perform best at \_\_\_\_\_ PSI.
6. When loading the gun be sure that it is \_\_\_\_\_ from the air supply line.
7. The nailer or stapler should be held \_\_\_\_\_ against the work piece before pulling the trigger.
8. Be sure to disconnect the air supply before making any \_\_\_\_\_ to the tool.
9. The tool should never be \_\_\_\_\_ by the air supply line.
10. The tool should not be left \_\_\_\_\_ with the air supply line connected.
11. All guns should be \_\_\_\_\_ each day before use.
12. There is never an excuse to \_\_\_\_\_ an air nailer or stapler at someone when the tool is connected or disconnected.
13. Jammed guns should be cleared \_\_\_\_\_ when the airline is disconnected.
14. Only after the tool is cleaned, lubricated, adjusted, and loaded with the proper nails or staples, can you \_\_\_\_\_ the tool to the air line for operation.
15. The nailer or stapler is a \_\_\_\_\_, not \_\_\_\_\_.
