**PACKAGING:** Poly Bag with Martex® Health Product Identification Sticker and UPC label

**PURPOSE:** Use for daily wear as recommended by the CDC for basic protection.

## How It's Made

Silver particles are permanently infused with polyester molecules to create a Silver fiber.

The new Silver fibers are blended with cotton to create a yarn for weaving. Silver in fibers will not wash or wear out.

## How It's Works

The negatively charged bacteria are attracted to the silver's positive charge.

The silver ions break down the cell walls and destroy the odor-causing bacteria as soon as they come in contact.

## Care Information/Disclaimers

### Care:

- **Machine or hand wash with similar colors, mild detergent.**
- **Non-chlorine bleach as needed.**
- **Tumble dry medium**

### Important Information:

- Our face mask is not recommended for the following uses: in a surgical setting or where significant exposure to liquid, bodily or other hazardous fluids may be expected; in a clinical setting where the infection risk level through inhalation exposure is high; or in the presence of a high intensity heat source or flammable gas.
- Our face masks are not N95 respirators. N95 respirators are evaluated, tested, and approved by the National Institute for Occupational Safety and Health, and reduce the wearer's exposure to airborne particles, from small-particle aerosols to large droplets.
- Our face masks are designed for: Professionals such as nurses, transportation employees, and emergency personnel. They are meant to provide basic protection.
- Silver-infused fibers: Our face masks use SILVERbac™ silver (Ag)-infused fibers to inhibit the growth of odor-causing bacteria. This antimicrobial technology is permanent and does not wash out.
