Data-Driven TV Campaigns

Audience Intelligence for Local

Plan your Effectv TV campaign the same way you plan your digital campaigns: Put your audience first

Local advertisers can now run media campaigns that achieve broad and targeted reach, increasing your opportunity of successfully reaching the right audience for your message.

We combine Comcast's viewership data with third-party data to identify groups of households that match your audience characteristics. We use this information to align your ad campaign with their viewing to increase your odds of turning them into customers.

How it works:

1. Select one of 85+ audience segments in addition to your Nielsen demo.
2. Tell us the zones you want to reach, campaign dates, and budget.
3. Our automated algorithm searches live inventory to build you an effective campaign achieving broad and targeted reach against the networks your audience is most likely to watch.

Now that's intelligent advertising!
