MESSAGE FROM THE ASIS&T PRESIDENT

I hope you all are doing well and taking care of yourselves. There is rest, diet, and exercise for physical health. There are friends, family, connecting, and endeavoring to learn and contribute for mental health and happiness! And what better place to be inspired and happy than an ASIS&T Annual Meeting! Such is the power of this amazing family of accomplished people who pull each other along! I'm reminded of the lines of the 15th-century poet Kabir, who wrote, "I went to see the beauty and I too became beautiful (or I went to see the light and I too became enlightened)!" (lālī dekhan main gayī, main bhī ho gayī lāl). As soon as you become an ASIS&T member, you are touched by the goodness of people and the desire to both be good and contribute - to the field and to those around you.

As President, I welcome you to the 85th Annual Meeting of the Association for Information Science & Technology. I'm confident that your presence will make it a success. In 2017, I had the honor to welcome you to the 80th Annual Meeting as Conference Co-Chair and it's already been five years. This year's conference theme is about reimagining an information resilient society and there's an exciting program of papers, panels, posters, and workshops, along with governance meetings, lunches, breaks, and receptions. The program has been carefully put together by Dirk Lewandowski and the program committee consisting of Jutta, Noora, June, Bhakti, Aylin, Souvick, Pnina, and Howard, and ably supported by Cathy Nash, Lydia Middleton, and all the amazing ASIS&T staff and volunteers. A big thank you to all of them!

As the conversations and sense of community that an in-person conference fosters are what makes ASIS&T what it is, the Board decided to have this Annual Meeting completely in person. I hope you will enjoy connecting with old friends, making new ones, and being inspired along the way. For people unable to travel to Pittsburgh, there are virtual options for poster sessions and workshops. The Information Science summit on October 28th, a joint iFederation initiative allows for both in-person and remote attendance. The Mid-Year Conference (launched earlier this year as the 24-hour global conference) will be virtual in nature. We have tried to balance the accessibility and convenience provided by remote options during the year with the connections and community enabled by an in-person annual meeting.

The 85th year of ASIS&T reminds us of its journey from 1937 until now as the American Documentation Institute (ADI), the American Society for Information Science (ASIS), the American Society for Information Science and Technology (ASIS&T), and the Association for Information Science and Technology (ASIS&T). Apart from name changes, these reflect the hard work of pioneering people across the decades and the work that continues. I had this epiphany yesterday that whatever titles, awards, and honors one receives during one's lifetime are just for that person, and go with that person. The work that one does and the contribution that one makes stay long after. You climb on the steps of those before you and create steps for those after you to continue making their own steps.

The latest name change in 2013 reflects our growing membership from across the globe. To help people know about ASIS&T in their own language, many people came forward this year to translate the About ASIS&T page to 27 languages and counting. We have been diligently following our strategic plan and making progress on several fronts - from strong chapter events, 24-hour Global Conference, strengthening relationships with other associations, ARIST, Information Matters, podcasts, Distinguished Member Program, a consulting arm, a recently-launched mentoring program, etc.

After eighty years, a little history has been in the making with increased diversity at the helm of this important association. The international character and diversity, equity, inclusion, and accessibility are becoming normalized and central to our thinking, even as more work needs to be done. ASIS&T strives to be an association that embraces people from across the world irrespective of race, class, gender, sexuality, ethnicity, nation, age, ability, and intersectionalities as long as they are interested in the study and practice of people and their interactions with information and technology.

I look forward to meeting you in Pittsburgh and getting to ask in person how you have been doing. See you there!

Warm regards,

GREETINGS FROM THE CONFERENCE CHAIR

Welcome to the 85th Association for Information Science and Technology (ASIS&T) Annual Meeting.

After one entirely virtual and one hybrid meeting, we are excited that this year's conference will be an in-person meeting again! I believe that all of you are looking forward to meeting your colleagues from all over the world again, joining them in the many exciting sessions the conference offers. And, of course, we hope you will take the opportunity to network with your colleagues at the receptions and over meals and drinks.

This year's conference theme is "Crisis, Transition, Resilience: Re-imagining an Information Resilient Society." As we all know, information plays a pivotal role for the good of society. However, we live in an information environment characterized by constant information overload and the fact that citizens are often unable to distinguish true from false, and interest-driven from balanced reports. With the

United Nations having declared the information situation around the Corona pandemic an "infodemic," and with a flood of misinformation and disinformation, there is a great need to create a resilient information environment for the future. Integrity, quality, and truthfulness are the critical factors in making information an asset rather than a liability to society.

With its unique focus on information, people, and technology, information science is at the forefront of conceptualizing, developing, and implementing solutions for a future information environment that not only reacts to crises but also helps protect society from future information crises. Quality information can play a pivotal role in helping people spring back after crises but also in preventing them. As the premier international conference in the field, the ASIS&T Annual Meeting is a forum to assist in addressing these issues as we continue to push forward the positive contributions of information and technology.

We have two exciting keynote speakers this year. In the opening plenary session, we have Kate Starbird, who is with the Department of Human Centered Design & Engineering (HCDE) at the University of Washington. She will speak about the production and spread of online rumors, misinformation, and disinformation during crises — including natural disasters, political disruptions, and a global pandemic.

Tackling the infodemic from another perspective is our closing plenary keynote speaker, Lee McIntyre. Lee is a Research Fellow at the Center for Philosophy and History of Science at Boston University. In his talk, "The Real Enemy of Truth is Disinformation, Not Misinformation," he will speak about how the deliberate production and distribution of disinformation affects knowledge in society.

We are fortunate for our conference leadership team, whose efforts were invaluable and without which none of this would have been possible. I extend a deep and sincere appreciation for their commitment, dedication, and hard work to the paper co-chairs Jutta Haider and Noora Hirvonen, the poster co-chairs June Abbas and Bhakti Gala, the panels & alternative events co-chairs Aylin Imeri and Souvick Gosh, and the doctoral colloquium co-chairs Pnina Fichman and Howard Rosenbaum.

I look forward to an important and exciting conference.

Dirk Lewandowski, Conference Chair

ANNUAL MEETING CODE OF CONDUCT

The ASIS&T community is diverse and inclusive, and this meeting is intended to be enriching and safe for everyone who attends. We expect all attendees, speakers, sponsors, and volunteers to treat everyone else respectfully, regardless of race, religion, gender, sexual orientation, disability, physical appearance, opinion, or national origin. Harassing behavior, such as offensive verbal comments, deliberate intimidation, sustained disruption of talks, or unkind feedback will not be tolerated. If you believe you are being harassed, notice that someone else is being harassed, or have any other concerns, please notify ASIS&T staff, who will assist you to ensure you feel safe and that the issue is resolved. ASIS&T reserves the right to take any action deemed necessary to enforce this code of conduct. It is our collective responsibility to foster a safe and inclusive environment for all.

THANK YOU! PROGRAM COMMITTEE, BOARD OF DIRECTORS AND ASIS&T STAFF

PARTICIPATORY DISINFORMATION: HOW WITTING AGENTS AND UNWITTING CROWDS COLLABORATE IN THE SPREAD OF DISINFORMATION ONLINE

Sunday, 30 October 2022 | 9:00 am - 10:30 am | Grand Ballroom 1

Dr. Starbird's research sits at the intersection of human-computer interaction and the emerging field of crisis informatics — i.e., the study of the how social media and other information-communication technologies are used during crisis events.

Currently, her work focuses on the production and spread of online rumors, misinformation, and disinformation during crises — including natural disasters, political disruptions, and a global pandemic. In particular, she investigates the participatory nature of online disinformation campaigns, exploring both top-down and bottom-up dynamics.

Dr. Starbird received her BS in Computer Science from Stanford (1997) and her PhD in Technology, Media, and Society from the University of Colorado (2012). She is a co-founder and current director of the UW Center for an Informed Public.

RESEARCH FELLOW
BOSTON UNIVERSITY

THE REAL ENEMY OF TRUTH THESE DAYS ISN'T MISINFORMATION, IT'S DISINFORMATION

Tuesday, 1 November 2022 | 1:15 pm – 2:45 pm | Grand Ballroom 1

Lee McIntyre is a Research Fellow at the Center for Philosophy and History of Science at Boston University. Formerly Executive Director of the Institute for Quantitative Social Science at Harvard University, he previously taught philosophy at Colgate University, Boston University, Simmons University, Tufts Experimental College and Harvard Extension School, and was Associate Editor in the Research Department of the Federal Reserve Bank of Boston.

McIntyre is the bestselling author of POST-TRUTH -- which was named a CNN Book-of-the-Week in April 2018 and a Best Book of 2018 by the PBS News Hour — along with fourteen other works of fiction and nonfiction, including DARK AGES (2006), THE SCIENTIFIC ATTITUDE (2019), and his latest book HOW TO TALK TO A SCIENCE DENIER (2021), which was named one of the 32 Best Nonfiction Books of 2021 by the Next Book Idea Club. His work has been translated into thirteen languages.

McIntyre's popular essays have appeared in the *New York Times*, *Washington Post*, *Boston Globe*, *Baltimore Sun*, *Nature*, *Newsweek*, *Scientific American*, *The Chronicle of Higher Education*, and numerous other venues. He has appeared on CNN International on Amanpour and Company — and several other programs on PBS, NPR and the BBC — and has spoken at the United Nations, the Aspen Institute, and the Vatican.

ARIST SEEKS REVIEW ARTICLES

Editorial Focus

ARIST welcomes comprehensive and systematic reviews on topics relevant to information science, computing science, and technology, broadly defined. An ideal ARIST manuscript will present both an historic overview and a discussion of contemporary trends related to the topic being investigated.

Pitch us a topic! Ideas include (but are not limited to) • The rise of "big data" and machine learning • Social media platforms and social change (e.g., #metoo; #blacklivesmatter) • Misinformation and disinformation • Implications of COVID-19 on health information seeking • Youth engagement with social media platforms (e.g., Tik Tok)

Scan the QR code to

- Link to Author Guidelines and More

Submission to ARIST involves a two-step process:

- 1) author(s) must **submit an initial Expression of Interest** via the ScholarOne portal; 2) authors of approved EOI proposals are invited to write a full manuscript, which will undergo a **peer review** process.

Information & Culture

2022
VOL. 57 | NO. 3

Information & Culture

Ciaran B. Trace and Andrew Dillon, Editors

Information & Culture is an academic journal printed three times a year by the [University of Texas Press](https://utpress.utexas.edu/). It publishes original, high-quality peer-reviewed articles examining the social and cultural influences and impact of information and its associated technologies, broadly construed, on all areas of human endeavor. In keeping with the spirit of information studies, we seek papers emphasizing a human-centered focus that address the role of and reciprocal relationship of information and culture, regardless of time and place.
