

Residential Kitchen

150-250K

2022 Coty Awards

This home's kitchen has undergone previous updates, but the family needed more space. Removing a wall created an open layout with a gourmet cooking zone featuring new appliances, including a 42" stainless steel range with pull-out spice racks in the vent hood.

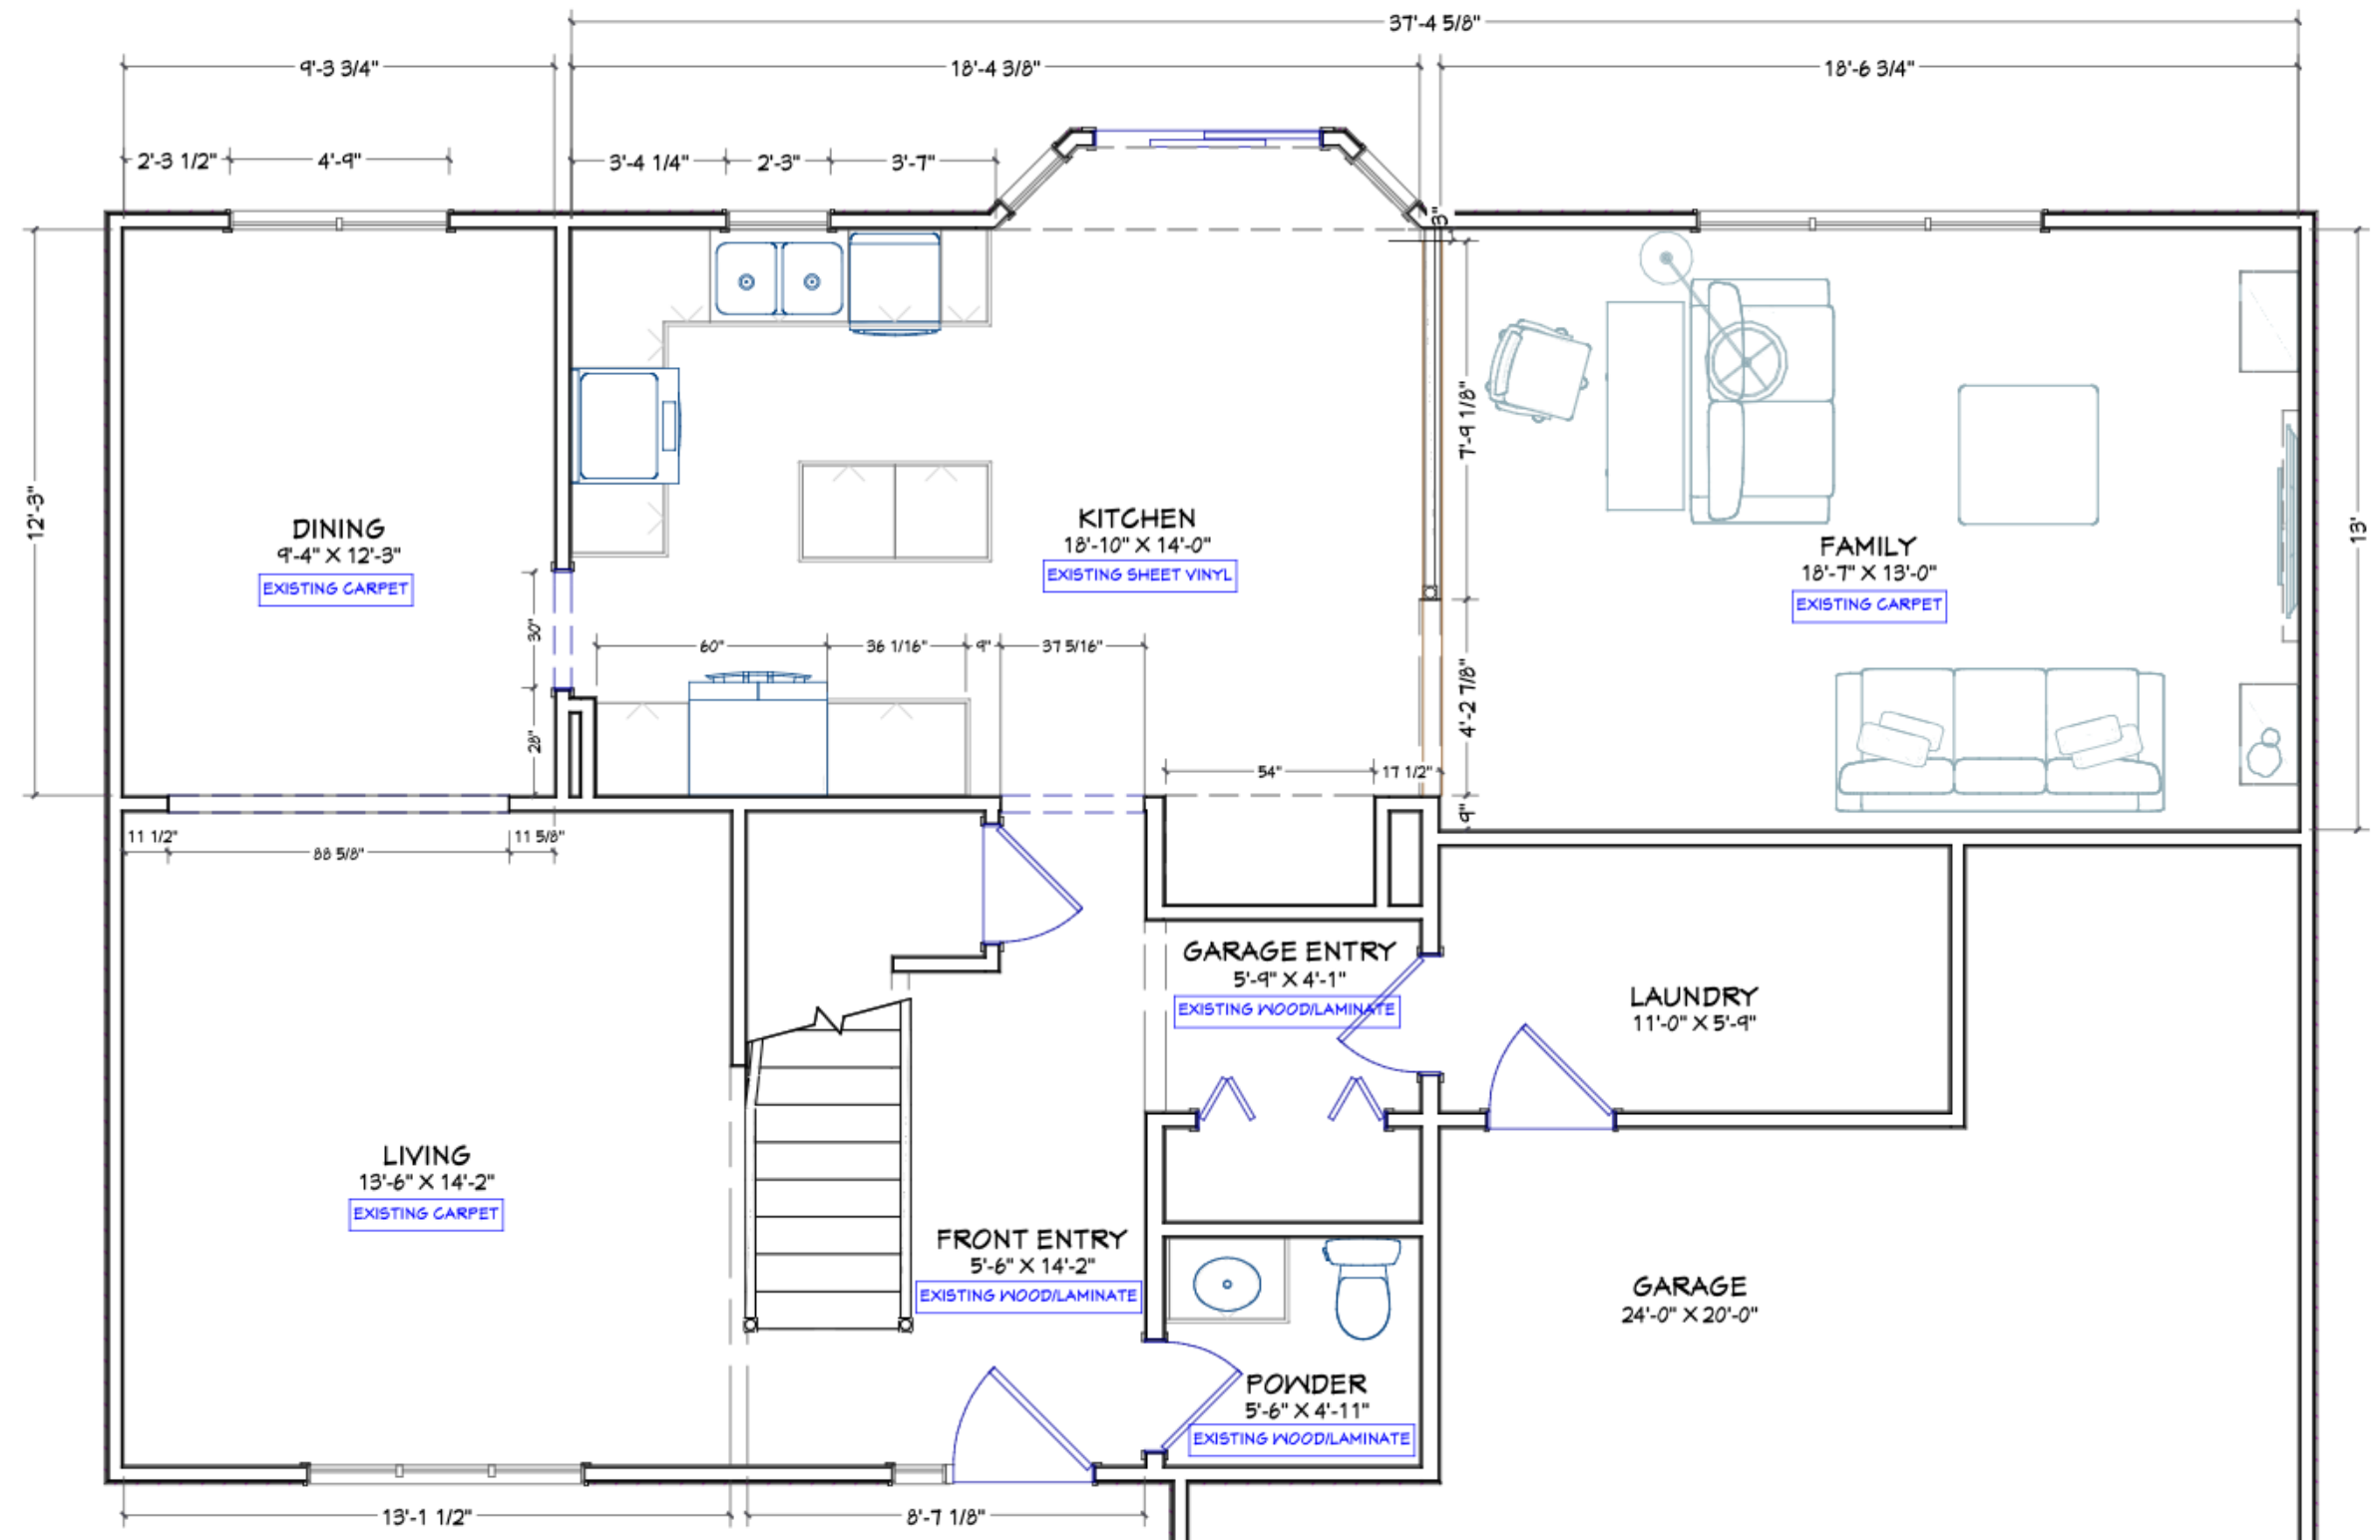

White cabinets keep the space light and bright and the coffee bar and beverage center were a must for this family. The functional spot is the perfect place for entertaining supplies and snack storage to grab on the way out the door! A prep sink and filtered water dispenser make it convenient to fill the coffee pot and water bottles on the go. A large pantry with sliding barn door and granite countertops give this kitchen everything the family needs.

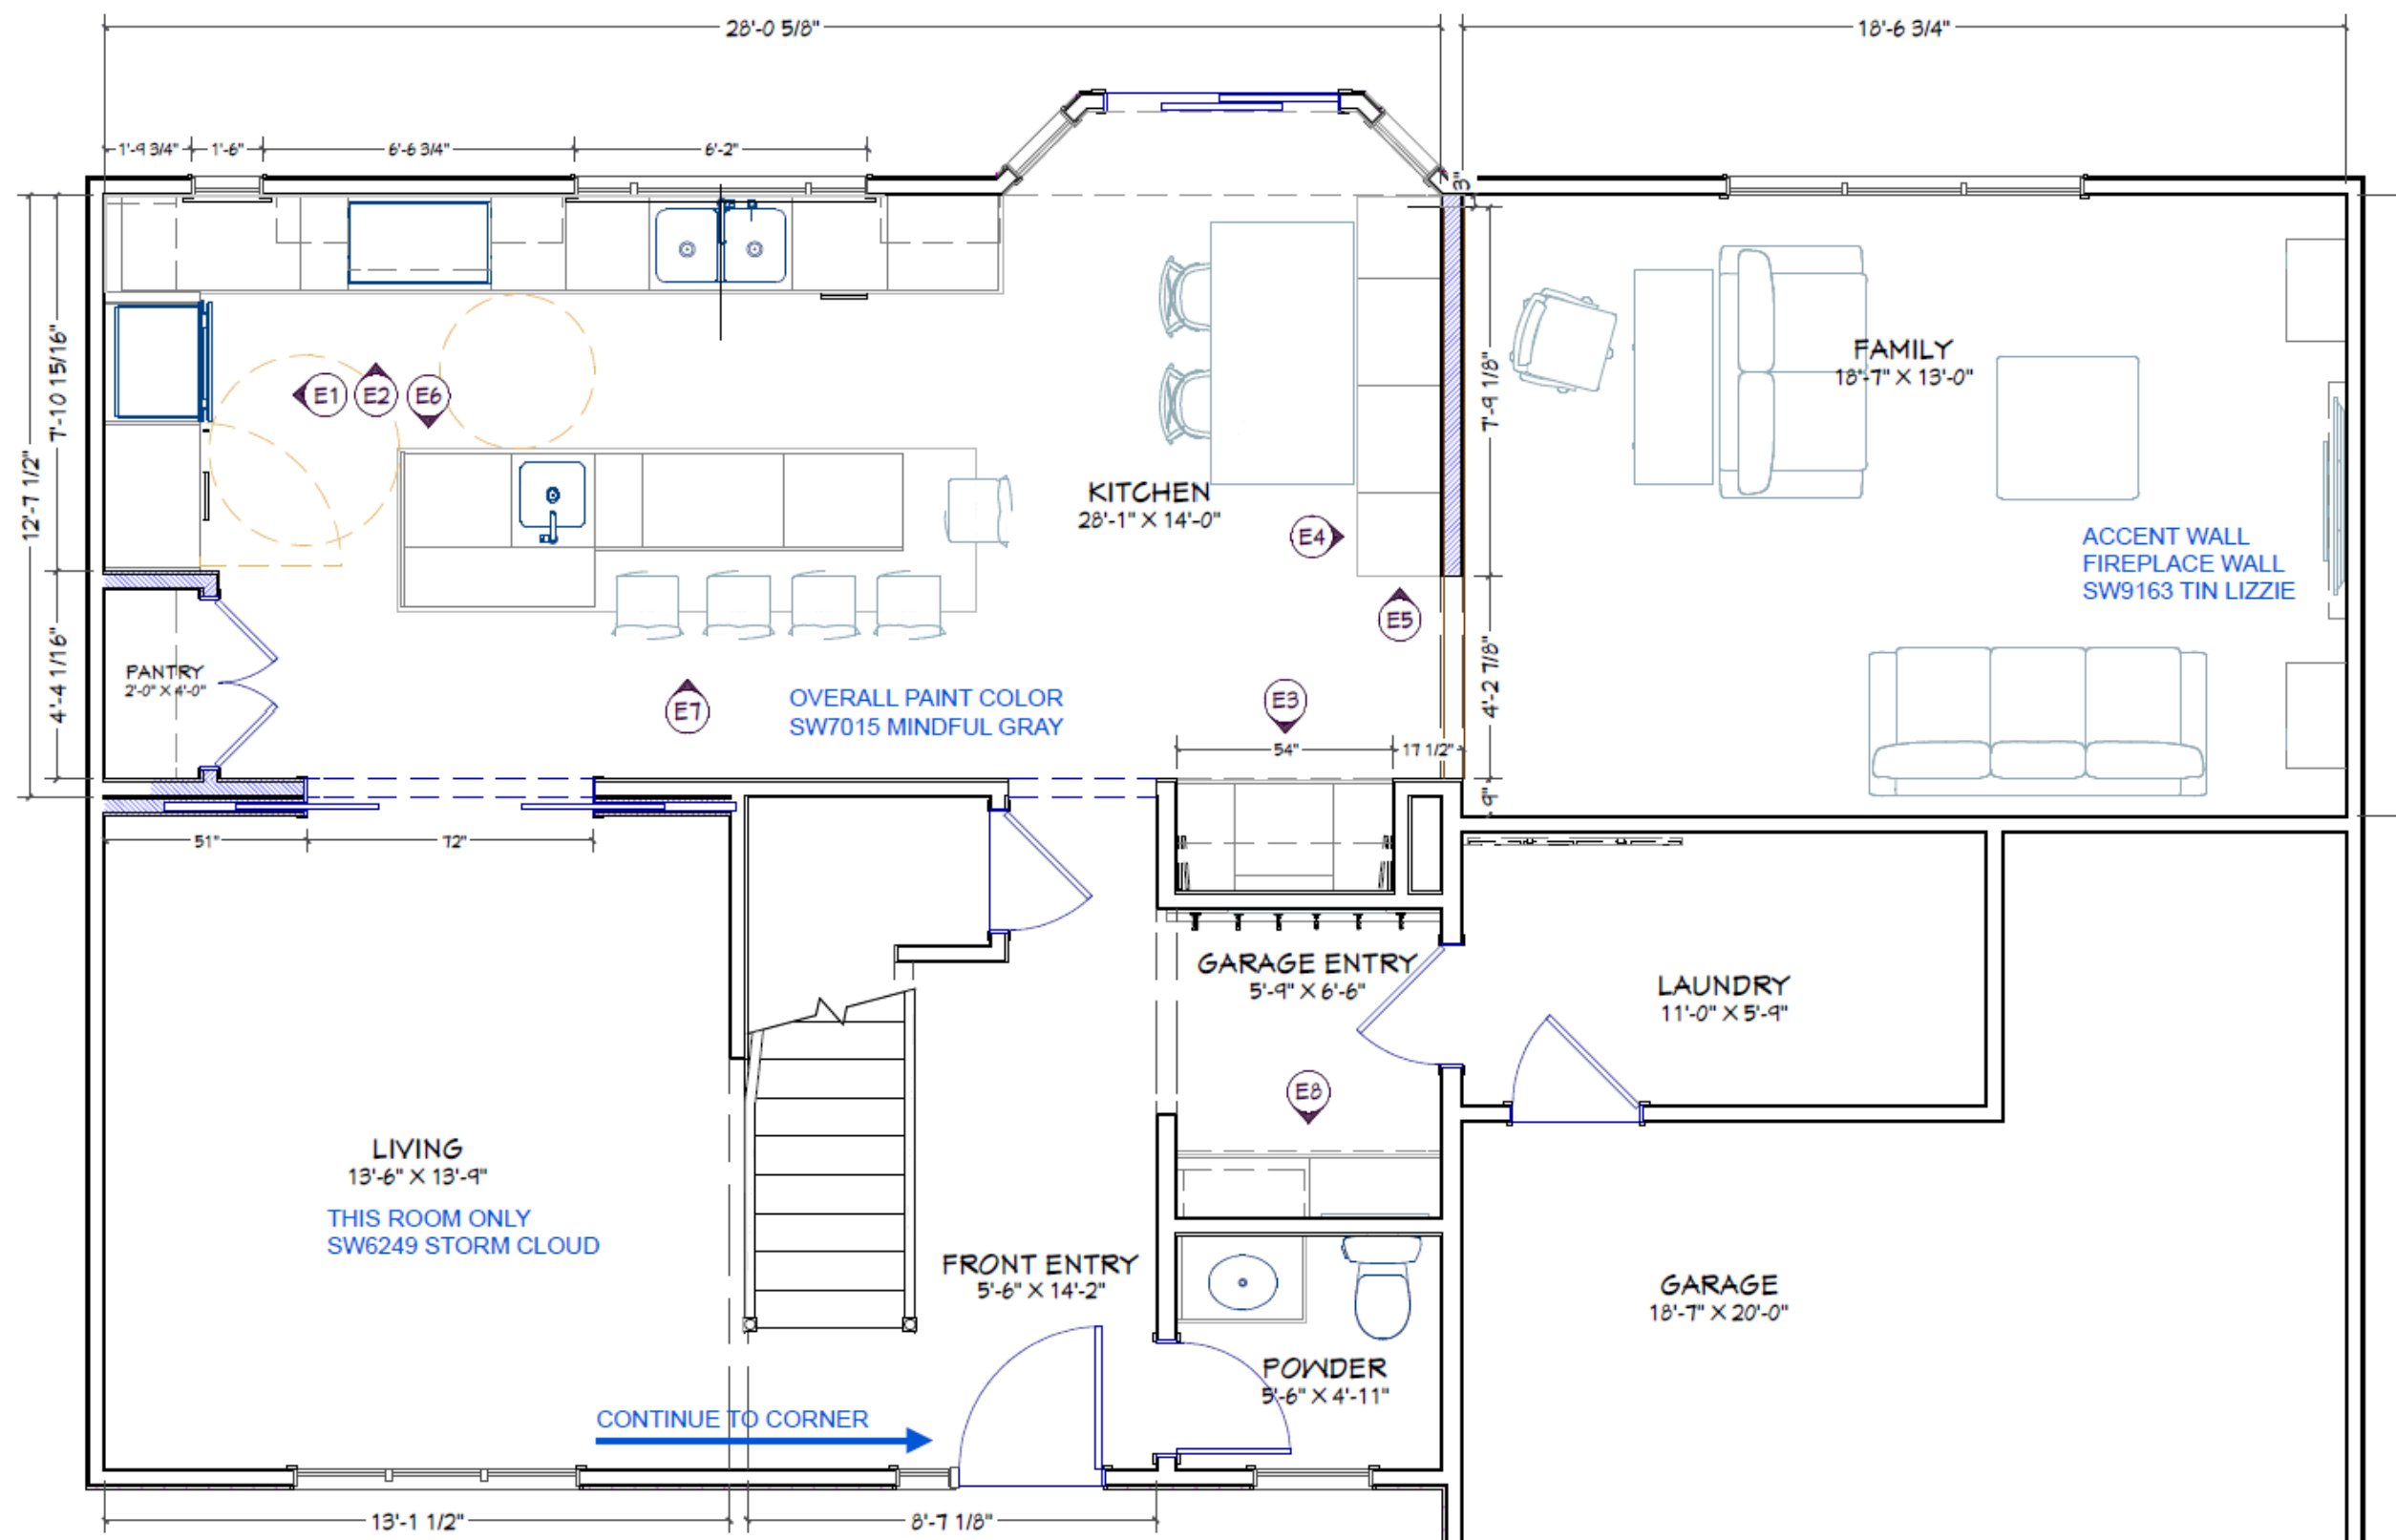

This transformation included the addition of a compact home office.

## Floorplan

# Needs, Wants & Wishes

- Medium to large working island (with 4-5 seats?)
- Floor to ceiling pantry – preferably walk-in
- Decent counterspace – we do lots of cooking and baking
- Lots of light – both natural and from lighting fixtures – possible new window on south side of house?

- Top of the line appliances (Almost a “must have”) Double oven - a proofing drawer would be nice. Looking at a column refrigerator with a separate counter-height double-drawer freezer.
- A second smaller sink – in island? At Beverage station?
- Coffee/Tea/Beverage area for coffee makers

- Breakfast nook
- Compact home office
