PROJECT DESCRIPTION

KITCHEN  
RENOVATION

Gazing upon the lake beyond her windows, her vision was to incorporate blues and natural hues that harmonize with the breathtaking outdoor panorama.

This renovation required the removal of original tile floors and the installation of new hardwood throughout the main level. Lacing the new with the old was a challenge in and of itself. This homeowner was specific about the look that she wanted, and finding the perfect finishes, tile and countertop styles was no easy feat. Our designers worked with the homeowner until the overall design reflected her aspirations entirely.

Previously abundant with golden oak cabinetry, outdated appliances and a bulky bathroom, this remodel was a necessary chapter of transformation for the homeowner. Renting out the place prior to her residence, she recently took control of the ill-kept, neglected space -which once was her father’s home- and reached out to us in hopes of establishing a newfound warmth and character to the place.

This homeowner also is an avid cook, a detail that significantly shaped the project's scope.

Overall, the renovation went beyond aesthetics; it embraced functionality and convenience with the integration of state-of-the-art appliances that cater to her culinary passions. She could not be happier with the results.
